

Gauge Carrier

PPS gauge carriers are machined from one solid metal bar to hold one to four gauges. The carriers are designed for measuring internal and/or external pressures.

APPLICATIONS:

- Drill Stem Testing
- Stimulation Monitoring
- Well Testing
- Injection Monitoring
- Reservoir Studies
- Perforation Monitoring

SPECIFICATIONS

Outside Diameter	5" (127mm)
Inside Diameter	2.25" (57 mm)
Length	76" (1930 mm)
Pressure Rating	Burst: 22,000 psi (150 MPa) Collaps: 21,000 pis (145 MPa)
Tensile Strength	470,000 lbs (220,000 kgf)
Material	AISI 4140
Thread Type	3 1/2" IF Box x 3 1/2" IF Pin
Weight	237 lbs (108 kg)

Other sizes and/or types of carriers are also available upon request.
